

MOUNTING INSTRUCTIONS
HLEDZ12, HLEDZ26
ZLEDZ12, ZLEDZ24, ZLEDZ36

- 1) You can either attach the Mounting Bracket to a wood frame or to a wood wall using the $\frac{3}{8}$ " screws, or into sheetrock using the anchors and 1" long screws where it will be centered on the artwork.**
- 2) Put the brass screw into the threaded hole in the tab on the Mounting Bracket. Just start the screw in the hole; don't let it stick out of the other side of the tab.**
- 3) Snap the arm in between the Mounting Bracket tabs, adjust the arm to the desired height, and tighten the brass screw to hold the arm in place.**
- 4) You may attach the black bumpers to the bottom corners of the picture frame. This will protect your wall from scratching and allow the frame to be offset from the wall, leaving room for the junction box on the end of the arm.**
- 5) Plug the light into a standard outlet.**

Contents of Mounting Package:

- (1) Mounting Bracket**
- (1) Brass thumbscrew**
- (2) $\frac{3}{8}$ " screws**
- (2) 1" screws**
- (2) Anchors**
- (2) Bumpers**
